

A

DRAWER CABINETS

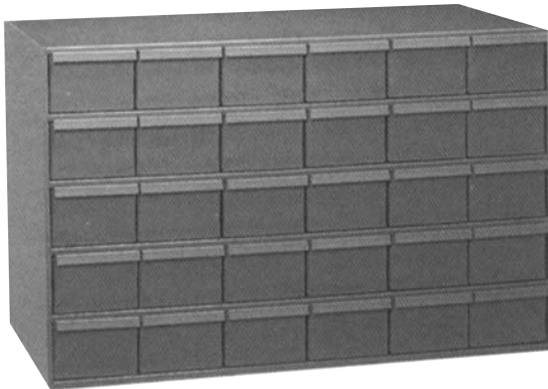

Cold rolled steel finished in rust and acid resistant baked enamel is the fabricating material. The use of vertical supports in construction results in great strength and allows Durham Drawer Cabinets to be stacked, regardless of the weight involved. The no-drag drawers have two embossed runners for smooth easy travel. The possibility of the drawers slipping out of the cabinet has been eliminated by a positive stop mechanism. Drawers for all Durham Drawer Cabinets offer double interlocked design resulting in unequalled rigidity. Handles are the full width of the drawers and are raised above the drawer so that the full front is available for identification. The sides of each drawer are designed to hold dividers on one inch centres. Two dividers are provided with each drawer. They have a special snap-in feature which keeps them snugly in place yet easily removable.
