

BELT REPAIR/ URETHANES

Fixmaster® belt repair products are tough urethanes designed to repair conveyor belts and other damaged rubber equipment quickly and easily. Durable, flexible repairs can be performed using formulas for temporary or lasting wear.

Fixmaster® urethanes are two-component, repair materials that can be trowelled, cast, or brush-applied to rebuild or protect critical operating equipment. Tough, rubber-like properties provide protection from impact, abrasion and corrosion. Fixmaster® urethanes are non-shrinking and unaffected by oil, grease and water. Use of the recommended accessory products ensures maximum adhesion and product reliability.

Fixmaster® Rapid Rubber Repair Urethane

Our premium quality belt repair product is designed to repair conveyor belts and other damaged rubber equipment quickly and easily. Repairs will have the same durability and flexibility as the belt. The 400 ml cartridge requires the use of a Rapid Rubber Repair Gun. Also available in a kit with etching agent, cleaner and accelerator.

Fixmaster® Instant Belt Repair

A single-component, heat-curing material for fast, temporary belt repairs. Requires no priming. Equipment can be operated in 30 minutes.

Fixmaster® Flex Conveyor Belt Repair Kit

Makes long-lasting belt repairs. Recommended for applications where speed of application is not critical. Cures in 8-12 hours.

Fixmaster® Flex Brushable

This two-part urethane brushes on to form abrasion and impact-resistant linings.

Fixmaster® Flex 80 Liquid

A castable, two-part urethane for making moulds, fixtures, expansion joints and non-scratching holding fixtures.

Fixmaster® Flex 80 Putty

A trowelable, two-part urethane for rebuilding and repairing rubber parts and linings, providing impact, abrasion and corrosion-resistant protection.
