PKG QTY. 1

Instructions

for the proper use of the 876-F04-1C Tool

Remove trim mouldings, wiper blades and any obstructions from around the glass. Starting at the bottom, push the cutting blade through the sealant staying as close to the bottom surface of the glass as possible. Now, begin pulling with a steady motion ... still keeping the blade against the bottom surface of the glass. Always take care to avoid damage to moulding clips and vinyl tops. Where there is a buildup of sealant (corners) a slight rocking motion will help. The cutting edges should always be kept as sharp as possible. A bench grinder or glass belt sander works very nicely. After several sharpenings the old blade should be discarded and replaced with a new one.

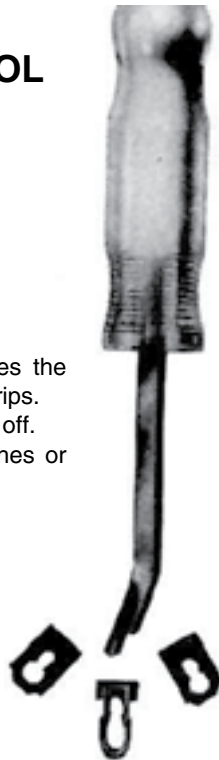

FOR BEST RESULTS KEEP CUTTING EDGES SHARP AT ALL TIMES.

MOULDING CLIP TOOL

SPAENAUR No.
876-024

This clever tool installs and removes the Plastic Clips which hold Moulding Strips. Just press down and slide Clip on or off. Helps avoid scratches on new finishes or injury to workers' hand.

PKG QTY. 1

GLASS RETAINER CLIP INSTALLER

SPAENAUR No.
876-139

A practical tool for placing trim retainer clips over headed studs welded around the body window shields and rear window openings. This tool reduces the risk of chips and scratches to glass windows put in by make-shift tools. This tool is specifically designed to fit trim clips over the studs and virtually eliminates glass breakage. It also dispenses with the need to remove rubber-like sealant surrounding the studs.

All-Rubber SealStrip®

Special Strength - Tough cotton fibres make SealStrip® amazingly strong, but it trims easily without special tools. **Uniform Tackiness** - Clings to glass during application, holds tight when glass is set. Yet it peels off the roll easily, without tearing. **No Oil required** - Applies easily, without oil. For special applications, SealStrip® will absorb oil and swell sufficiently to ensure extra-strong grip. **Resists Age** - Thousands of applications prove that SealStrip® holds its physical characteristics, including tackiness throughout its life. Even moisture cannot affect the setting. **Won't Discolour Glass** - Laminated safety glass is safe from discolouration, because the specially compounded rubber used in SealStrip® will not bleed.
