</table>

Grade 30 & Grade 70 Chains Must Not Be Used For Overhead.

### Standard Lever Load Binder

- Forged Steel - quench and tempered. • Ball and socket swivel joints at hook assemblies permit a straight line pull. • Do not operate load binder while you or anyone else is standing on the load. • Tighten handle in a downward manner. • Do not use handle extension for tightening. • Secure position of binder by wrapping the loose end of chain around the handle and tighten chain. • Always stay “clear” of the handle as it could snap back. • Do not close your hand around the handle. • Inspect binder prior to use and discard in case of signs of wear.

### Chain & Bolt Cutter

**Cutting Capacity:**

1/2" for Grade 30 Chain
3/8" for Grade 70 Chain
Length: 42"
Weight: 18-20 lbs.

**Blade Material:**

- Alloy Steel, Satin Finish.
- Adjustable Blade Clearance.
- Suitable For Mild Steels Only!

*Recoilless type

**Warning:** Never exceed working load limit! Failure to follow instructions can result in serious injury!

See following page for chain accessories
