HAMMER-LOK COTTER PINS

Length under head to end of longer shank.

INSERTING

LOCKING

UNLOCKING

Spread and locked with one blow from a hammer. The handiest cotter pin you ever used.

**Easiest to Insert** - As the shanks are parallel and the points well tapered, they slip smoothly through the hole.

**Easiest to Lock** - Just hit the head with a hammer. This causes the shorter shank to ride over the upturned point on the longer, automatically spreading the pin and locking it rigidly in place.

**Easiest to Remove** - Insert a screwdriver, tang of a file, or any thin tool in the eye and twist. This returns the short shank to its original position, and the pin is then removed the same as an ordinary cotter.

**May be used as ordinary cotters**, when desired. The points can be spread with pliers in one twist because one point is longer and turned up, easy to grasp.
