DISC-LOCK®

Inch
Pouce

**Bolt it together
and it stays that way!**

Disc-Lock self-locking washers are hardened steel washers that mate together against a series of inclined cams. The back side has ridges that will bite into the joint material and the nut or capscrew. As one of the Disc-Lock washers attempts to rotate with the nut or capscrew, the preload is actually increased, further locking the nut. When removal of the fastener is necessary, approximately 50% more torque is required for loosening than tightening. The Disc-Lock has been developed in America, and is virtually vibration-proof, according to U.S. Military specifications.

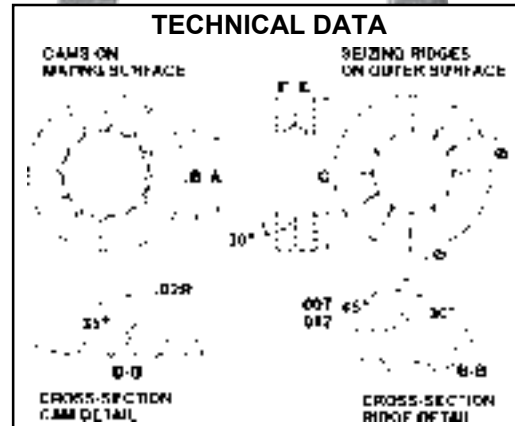

*When you bolt pieces together,
it's a good feeling to know
they will stay that way...*

INCH SPECIFICATIONS
(with approximate mm bolt size)

A4 (316) Stainless Steel	For Bolt Size		Inch Dimensions			PKG QTY. Pairs

Disc-Lock washers are steel case hardened to RC55 and zinc plated.

Note: Disc-Lock washers are priced by the pair. A package of 50 (pairs) contains 100 identical pieces.

* Weight and thickness of pairs will vary slightly with gauge of metal.
