Slam Latches & Paddle Handles

Loquets à ressort et loquets à palette

SLEEK, CONTEMPORARY ... Eclipse® adds value to cabinets, consoles, panels, controls enclosures, etc., with SEVEN different styles from which to choose. Low profile appearance.

THE ECLIPSE® LATCHES are available from stock in non-locking and key-locking versions (furnished with 2 keys).

Photographs shown are actual size. Latches available in BLACK MATTE FINISH.

LATCH MATERIALS

HOUSINGS and HANDLES — Made of thermoplastic alloy. A polycarbonate-based polymer blend providing strength, light weight and excellent heat and chemical resistance.

SLIDE BOLT and PIVOT LEVERS — Made of nylon with 30% fiberglass reinforcement for wear resistance and a smooth operation.

METAL STAMPINGS and FASTENERS — 300 Series Stainless Steel.

KEY CYLINDERS — Zinc die cast.

FEATURES & BENEFITS

Installation is fast with the use of the mounting bracket and (2) screws, which are provided. No external fasteners. No weld marks to mar finish. Eclipse® latches can be assembled on finished panels. An oil-resistant flange gasket is also provided. All Eclipse® series latches fit the same size cutout.

**Pull Ring Latch
(Slam Latch)**

The Eclipse® pull ring handle offers a simple, one-finger activation.

Suggested Cutout

099-400 Non-Locking

Weight: 1 lb. each

To comply with FMVSS 206 Standards, the Striker Bolt supplied must be used in a certified FMVSS Door System.

Rotary Latching Points

Mounts through the pivot points of the mechanism rather than through the holes of the case extension.

This latch can be used on cab and other vehicle door applications to which the FMVSS 206 applies. It can also be used on any other enclosure application that would benefit from positive latching.

When the door is closed, the gripping member of the latch captures the shank of the hex-headed striker stud horizontally, vertically, and axially. The design affords easy trip-release action, positive gripping, and smooth opening and closing. Both primary and secondary latching capabilities are inherent in the design.
