## STAINLESS FORGED EYE BOLTS

PLAIN & SHOULDER STYLE

304 Stainless Steel

SHOULDER TYPE  
(with nut)

PLAIN TYPE  
(with nut)

Supplied with standard UNC-2A threads and heavy hex nuts.

Applications in the following industries:

- Food Processing
- Chemical
- Pulp & Paper
- Nuclear
- Marine
- Sewage Disposal
- Petroleum
- Aircraft

**Note:** All Eye Bolts and Eye Nuts, whether in blanks or fully machined, as shown on page B267, are covered by our standard warranty. The warranty becomes VOID whenever modifications are made or further machining is done by the buyer, also in cases where these items are subject to an angular lift or pull.

**\*WARNING:** Lifting eye nuts and bolts must always be tightened so that they bear solidly on the surface they contact. Loads at right angles to the plane of the eye are prohibited. When a specified position in relation to an axis, edge or the like is specified for the lifting eye nut/bolt when screwed in/on, shims should be used if necessary in order to rule out unacceptable loading. The loading values specified apply solely to the use of lifting eye bolts/nuts according to the present Standard on workpieces made of steel, cast steel or grey cast iron. When the lifting eye nuts are used on a metric bolt thread of medium tolerance class, the thread length must be no less than 0.8 nom. dia. and the tensile strength of the bolt not in excess of 500 N/mm<sup>2</sup>.
