VELCRO® Pressure-Sensitive Backing (Peel-off Style)

Pressure sensitive pre-coats are popular because of the ease of application. Simply remove the release medium and press VELCRO® tape in place, on a clean, oil free surface.

Pressure sensitive pre-coats should always be considered semi-permanent bonds.

Hook and Loop must be ordered separately.

VELSTICK® semi-rigid FASTENER

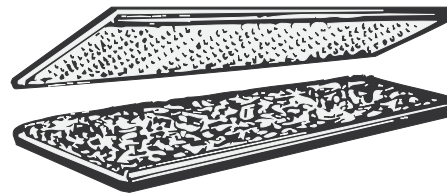

Furnished in separate, mating components

NYLON HOOK 88

NYLON LOOP 1000

25 mm wide x 1.2 metres long (1" x 4')

25 mm wide x 1.2 metres long (1" x 4')

Designed for mechanical attachment with staples, tacks, rivets, screws, etc., or for retention in a channel. Readily cut with shears, or drilled or punched as may be required.

In many instances, only one VELSTICK® component is used in conjunction with the mating VELCRO® tape component. As an example, an elevator carpet installation would utilize a VELSTICK® component on the floor of the cab while the mating tape component would be glued or stitched to the underside of the carpet. Other similar uses would be access panels, valances, removable upholstery for commercial seating, cushion and pad placement on examining tables and charts, picture and wall hangings for both the home and industry.

Furnished in lengths of 25 mm wide x 1.2 m long.

VELSTRAP® Fastener

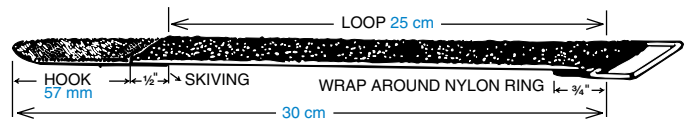

the most versatile method of cinching or strapping.

VELSTRAP FASTENERS are fabricated from Velcro Hook #88 and Standard Loop #1000 Nylon Tapes, plus a specially designed Nylon "Tuck Loop" or ring, joined and heat-sealed into a complete strap unit.

All Velstraps 25 mm wide

(Available in **19 mm** and **50 mm** widths – subject to minimum order. Contact Sales Desk for a Quote)

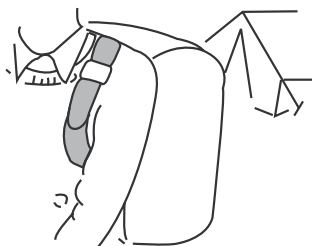

Velstraps are completely washable. Not affected by most oils and grease.

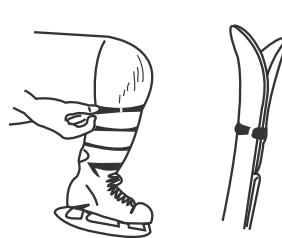

Above shows typical assembly, **30 cm** Velstrap. Longer Hook sections appear on **80 cm** and longer, for greater security.

MOULDED NYLON ARROWHEAD TAPE

Moulded semi-flexible nylon hook configuration. Pressure sensitive adhesive precoat backing.

SPAENAUR No. **888-243**

PKG QTY. 25

One Roll 25 mm (1") wide x 25 metres long.

A specially designed high profile arrowhead shaped hook configuration. This hook was engineered to be mated with various woven and knitted loops, with reticulated foam (pore sizes 10 through 60), uncut loop carpeting, and woven filter materials. Mated with the correct loop it is especially suitable for fastener applications in Automotive and Aircraft assembly where high strength and low opening and closing cycles are the design parameters.

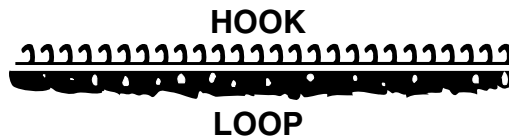

Shear Strength	Tensile Strength	Peel Strength
<p>2590 g/cm² (22 PSI) average (Shear strength doubles when closure applied around a curve)</p>	<p>1050 g/cm² (12 PSI) average</p>	<p>890 g/cm² (2.5 PIW) average.</p>
Cycle life (To 50% original shear)	This molded hook tape may be "cycled" with a mating loop tape 25-40 times.	

The strength of VELCRO® fasteners is dependent mainly on the pressure applied in closing, plus other minor factors. Prototype products should be tested prior to production.

Caution

- Coupled with this high holding strength are several features which restrict the usage of the moulded tapes.
- The semi-flexible hook increases degradation of the loop component and limits cycle life.
 - Moulded tapes tend to become brittle in cold temperatures.

VELCRO® BACK TO BACK UTILITY TAPE STRAP FASTENERS

Back to Back is a continuous two-sided hook and loop self wrapping and reusable fastening tape. Production is achieved by permanently adhering the VELCRO hook and loop tape backs together.

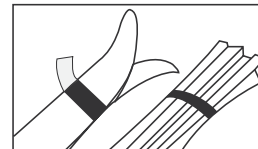

The standard product combination consists of VELCRO hook #88 with Loop #1000. Other tape combinations are available by special order.

Velcro® Fasteners

Fermeurs Velcro^{MD}

VELSTUD® Fastener

For those applications where the surface of the substrate limits the area of attachment, or of those where a pre-punched or pre-drilled hole provides the easiest method of installation. Used to secure speaker grills, acoustical and wall panels, energy poles, displays, store fixtures, etc.

A rigid moulded nylon fastener with a **25 mm** square face, to which VELCRO® moulded nylon hook tape has been permanently attached. The underside has a **13 mm**-long serrated shank. Designed for shank insertion into a **6.4 mm** dia. pre-punched or drilled hole; minimum wall thickness of **0.8 mm**

For use with Velcro
