PUSH-ON TRIM SEALS TO WEATHERSTRIP AND DECORATE VEHICLE DOORS

Push-on trim seals offer a fast, easy way to weatherstrip and trim vehicle doors and windows. They install by simply pushing them over raw edges or flanges.

VINYL AND SPONGE RUBBER PARTS

"ST" Sections

"ST" Section parts are made of EPDM sponge seal which is attached to a black leather-grain vinyl trim with a segmented steel core. These flexible parts push on a metal flange to trim the interior and seal the opening.

They grip edges from .060" to .140" thick.

Vertical Wedge

DUAL DUROMETER SPONGE AND SOLID RUBBER PARTS

"BZ" Sections are dual durometer EPDM flexible rubber extrusions. The sponge bulb seals the opening, and the durable solid rubber base, with a flexible wire core, provides high strength gripping power.
