TRIM PAD REMOVING TOOL

Used to pull out the plastic trim pad fasteners on GM cars since 1971. Saves the fastener, and avoids damage to the trim pad backboard, paint, etc.

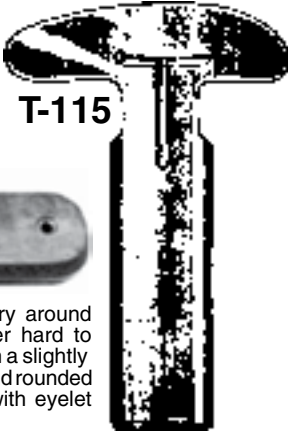

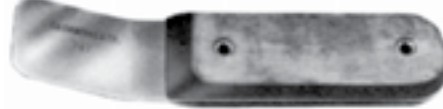

HEADLINER TOOLS

Used to stuff headliner into channel above doors, etc. Blunt edge will not damage the material. Easy to use around curves and near corners.

Revolving Punch

For Professional and Industrial Use

PKG QTY.
1

6-tube punch
Length of Punch

876-136

8-1/2"

This punch has been known for many years as the best Revolving Punch ever made. The frame is made of forged steel, highly polished. The cutting tubes are hand turned from high carbon tool steel, and threaded to allow easy replacement. These tubes are individually tempered.

Replacement Tube Punches available for 876-136

Order by SPAENAUR No.

(Tube punches for 876-137 cannot be replaced.)

876-137

Length 8"

A fine quality, inexpensive pressed-frame revolving punch with drive tubes. All tubes are heat treated to give long wear. Fully nickel plated. Furnished with six tube sizes:

●	●	●	●	●	●
1	2	3	4	5	6
5/64"	3/32"	7/64"	1/8"	5/32"	3/16"

For punching holes in leather, plastic, rubber, cork, etc.

NOTE: Dab outside of tube with light oil. Holes will be easier to make.

T-240 COMBINATION RIPPER AND TACK LIFTER for heavy-duty work.

Drop forged high carbon or alloy steel. Plastic handle.

PKG QTY. 1

STAPLE KNOCKER 876-732

PKG QTY. 1

Staple Knocker for removing staples and shredded material. Manufactured from top-grade steel. Electronically hardened working ends. Easy to grip plastic handle.

STAPLE LIFTER 876-731

PKG QTY. 1

Same specifications as Staple Knocker, except shank has a greater angle to facilitate lifting the staples instead of knocking them out.

T-241 RIPPING CHISEL

Rugged enough to shear a six-penny nail without damage to the edge. Unbreakable plastic handle.

RETAINER BUTTON REMOVER FOR AUTO TRIMMERS

SPAENAUR No.

876-023

Special pliers for removing the retainers from the underside of auto upholstery buttons. Does not damage buttons or retainers, so that they can be reused. This tool is a great money and time saver. A difficult job is now easy.

To remove the retainers, the lower forked jaw of the pliers is inserted between the retainer and the upholstery material with the pin of the button in the forked portion of the jaw. The upper jaw with dimple is then in position for the pointed pin of the button to fit into the dimple. Then with pressure on the pliers, the retainer will snap off the button. On buttons with two pins, the procedure is repeated. If the retainer does not snap off, rotate the pliers a quarter-turn and apply pressure again. After removal, if the ears on the retainer plates are slightly distorted, they can easily be flattened to original shape by using a tack hammer on a solid, flat surface.

PKG QTY. 1

All Purpose Awl

876-138

PKG QTY. 1

The bent awl is a varied-purpose tool. It assists in the installation of roof windows, windshield rubber and back glass. It is used to remove body clips, mouldings and for spring pulling and cotter pin extracting or for radiator hose removal. Great for hard to reach places. Can be used to remove small staples in grooves. Tempered end.

SAILMAKER'S PALMS

Sewing Palm

Right-hand style shown.

A hide-bound, iron thimble palm, riveted joints. Furnished either in right or left-hand. Right-hand will be furnished unless otherwise specified.
